

Durable Medical Equipment Service & Sales

We at ACT can provide you with all the respiratory products that you require. Our customer based program makes it easy for you to own your own equipment. This is a unique feature of our program. Other Respiratory product providers require you to rent which can be much more expensive for you.

At ACT we pride ourselves on our customer service. All your products will be delivered to your door so that you will never have to leave your home. We take care of everything, including sending your request through your insurance, notifying you of your liability *before* you receive your product and programming your machine to your specific needs so you will be able to simply take your machine out of the box plug it in and turn it on.

Please give us a call for more information on how to get started.

* What is Sleep Apnea?

Sleep Apnea is a condition characterized by episodes of stopped breathing during sleep and is a serious problem for many people. A simple sleep study can determine if you have obstructive sleep apnea.

What are the effects of Sleep Apnea?

Because of the serious disturbances in their normal sleep patterns, people with sleep apnea often feel very sleepy during the day and their concentration and daytime performance suffer. The consequences of sleep apnea range from annoying to life-threatening. They include depression, irritability, sexual dysfunction, learning and memory difficulties, and falling asleep while at work, on the phone, or driving. It has been estimated that up to 50 percent of sleep apnea patients have high blood pressure. Risk for heart attack and stroke also may increase in those with sleep apnea.

 There are several ways to combat against Respiratory problems. Some examples include CPAP's, BiPAP's, AutoPAP's and Oxygen Concentrators, Nebulizers, Ventilators, and more.

Respiratory Product Information

CPAP's, BiPAP's, AutoPAP's

What do those stand for?

Answer: **CPAP** is an acronym for Continuous Positive Airway Pressure, **BiPAP** is Bi-Level Positive Airway Pressure, and **AutoPAP** is automatic Positive Airway Pressure.

What does that mean?

All of these machines are devices which deliver air through a mask while you sleep. This air flow, acting as a splint, keeps your breathing passage open and helps to prevent apneas (cessations in breathing) while you sleep.

Oxygen Therapy

 COPD refers to a few different diseases that affect the lungs such as emphysema and chronic bronchitis. Patients with COPD have a hard time breathing because their airways (the tubes that lead to the lungs) are swollen or their air sacs are damaged. This affects the exchange of oxygen and carbon dioxide in the lungs—making it hard for oxygen to get into the lungs and carbon dioxide to get out.

Respiratory Products

ACT offers products from a wide range of vendors including Fisher & Paykel, Invacare, Resironics, and ResMed.

Fisher & Paykel CPAP with heated humidification and Nasal mask.

Resironics BiPAP Auto

ResMed Full Face Mask

Invacare 5 Liter Oxygen Concentrator
